iRIS Accounts and Access

General iRIS Access Notes

Getting an Account: Individuals with a UCSF ID

Getting an Account: Affiliates

Listing Non-UCSF Collaborators in iRIS

Departmental Access to iRIS

General iRIS Access Notes

The current version of iRIS is compatible with all browsers and Windows, Mac and Linux operating systems. See the [FAQs \[1\]](#) for more info.

You must have a [MyAccess \[2\]](#) account to get into iRIS. Follow the instructions below if you do not have a MyAccess account or a UCSF ID.

Sponsors are not considered affiliates and do not qualify for access to iRIS. Study teams should download all regulatory documents and maintain copies in the regulatory binder.

Getting an iRIS Account: Individuals with a UCSF ID

Follow these instructions if you are UCSF faculty, staff, resident, fellow, or student OR if you

have a UCSF ID # and MyAccess [2] account for other reasons.

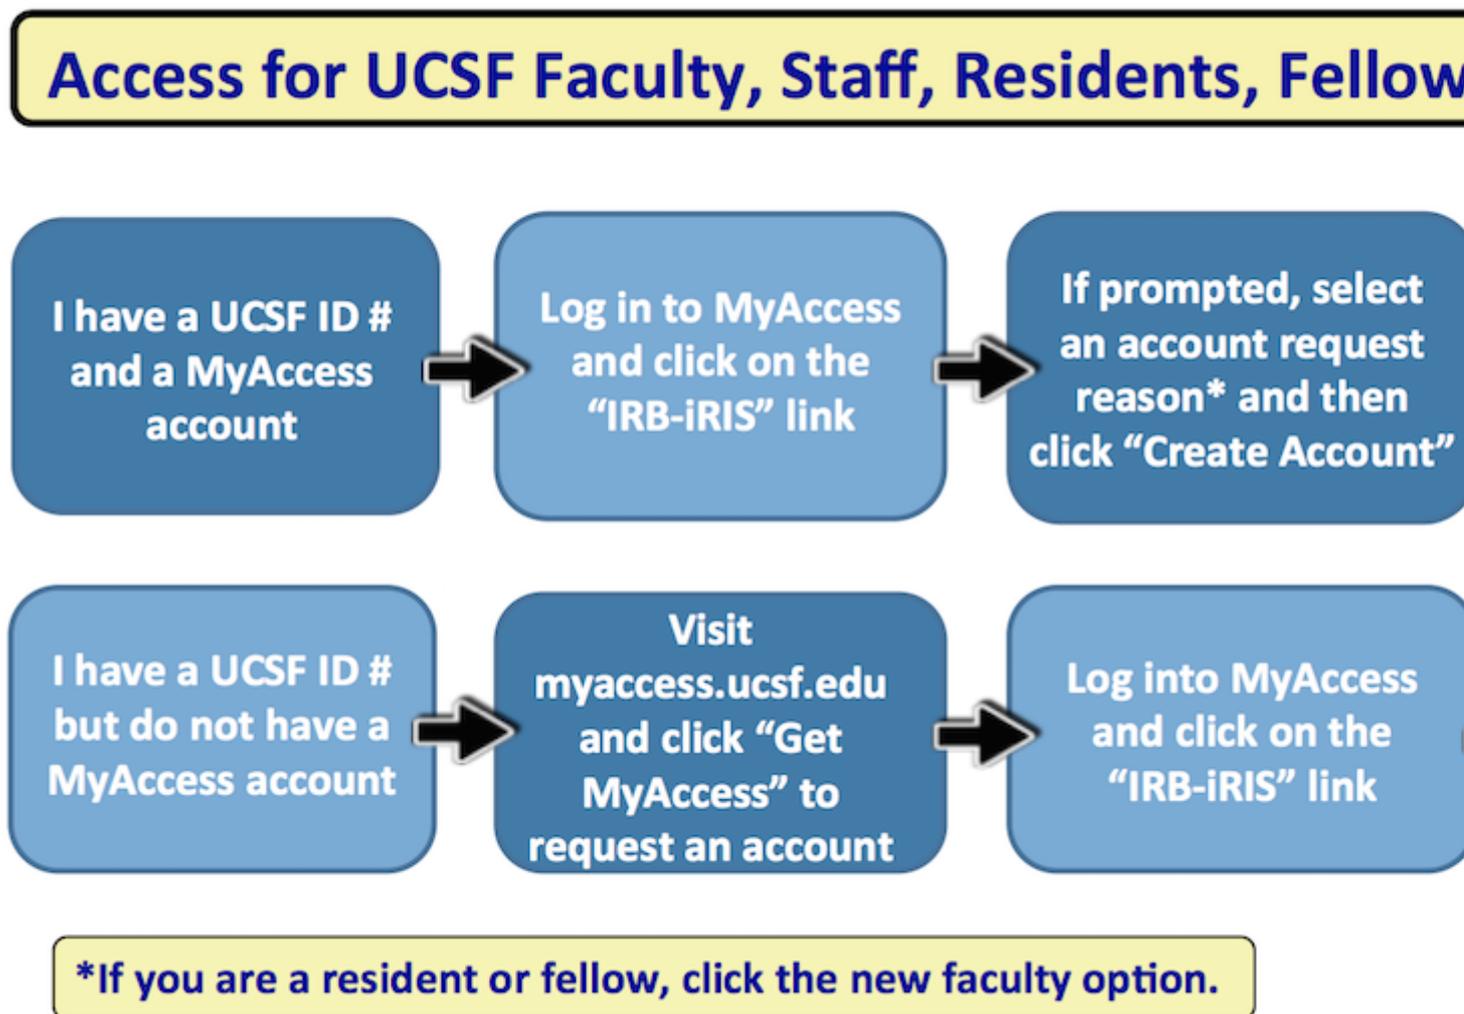

I have a UCSF ID # and a MyAccess account

- Log in to MyAccess [2] and click on the ?IRB-iRIS? link.
- If prompted, select an account request reason and then click ?Create Account.? If you are a resident or fellow, click the new faculty option.

I have a UCSF ID # but do not have a MyAccess account

- Visit the Get MyAccess page [3] and request an account. Contact UCSF Information Technology Services (ITS) [4] for help.
- Log into MyAccess [2] and click on the ?IRB-iRIS? link.
- If prompted, select an account request reason* and then click ?Create Account.? If you are a resident or fellow, click the new faculty option.

Access flow chart

See the iRIS FAQs [1] for information on getting access to individual research studies after

your account is active.

Getting an iRIS Account: Affiliates

A UCSF PI must complete an iRIS Access Request Form ^[5] for affiliates, as described below. Access is valid for up to one year. Read below if you are unsure whether an outside collaborator needs an iRIS account.

If you have a UCSF ID # and MyAccess account, do NOT submit the iRIS Access Request Form. Follow the instructions above ^[6].

You are a PI and need to add an affiliate to your studies in iRIS

1. Complete the iRIS Access Request Form ^[5].
2. Scan and email the form to IRB@ucsf.edu ^[7].
3. After the UCSF ID for the affiliate is created, you will be able to search for and add the affiliate to your studies in iRIS.

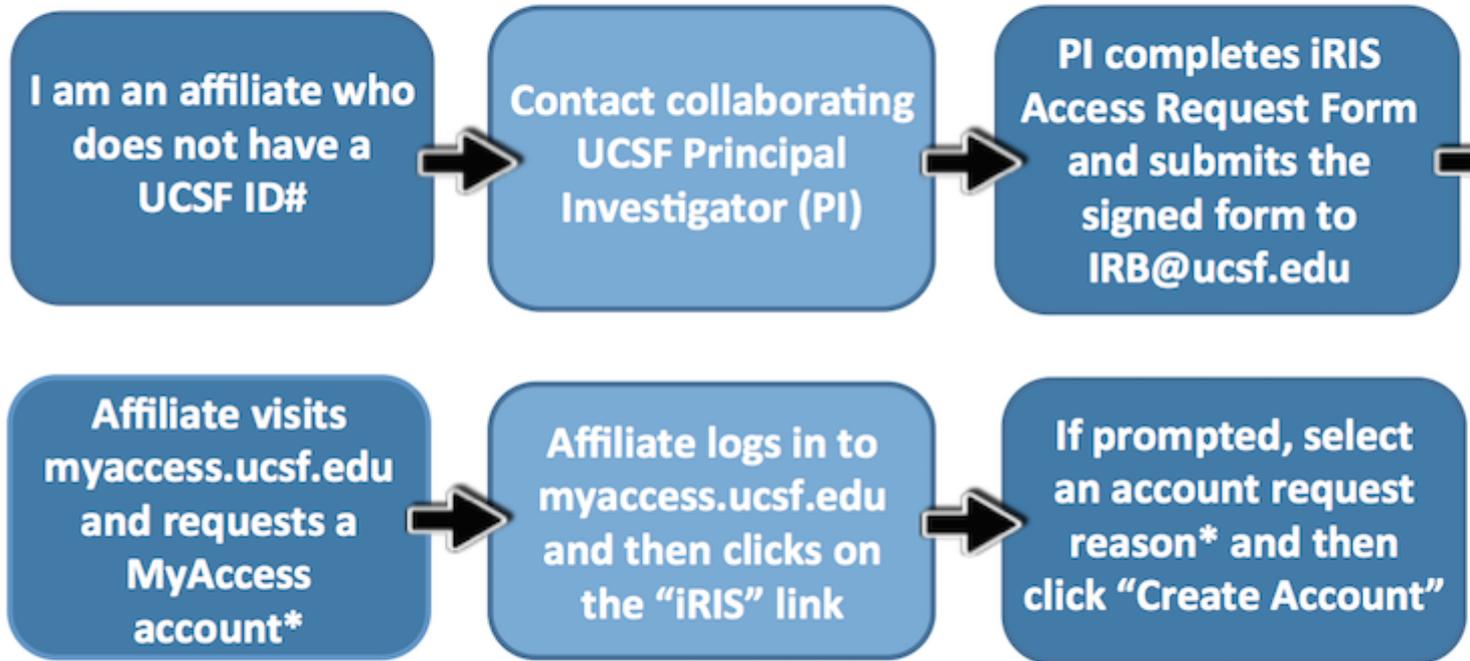

You are an affiliate who does not have access to MyAccess or iRIS

1. You need special iRIS affiliate status to get this access. Contact the PI you work with at UCSF and request access to iRIS. The PI should follow the directions above. Note: If affiliates do not have a department to vouch for them, contact the HRPP office at 415-476-1814.
2. After access has been granted, go to MyAccess ^[8] and click the ?Get MyAccess? link to set up your account OR ask your UCSF collaborator to add you to a study.
3. Go to the MyAccess site ^[8] and sign in.
4. Click on the "IRB-iRIS" link. Fill out the account request reason page, if prompted.

Access flow chart

Access for Affiliates

Note: Affiliates are granted access ONLY if a UCSF collaborator requests the access and

***The UCSF collaborator may also just add the affiliate to a study.**

Annual affiliate renewal process

Affiliate accounts expire annually in February. The affiliate's account will be automatically renewed if the affiliate a) is listed on an active study and b) has logged into iRIS in the last year.

If the affiliate does not meet the criteria for automatic renewal, the account will expire and the affiliate will not be able to log into iRIS. However, the affiliate can still be added to studies.

If an affiliate with an expired account needs to login to iRIS, the affiliate should contact the UCSF sponsoring PI and ask the sponsor to complete the iRIS Access Request Form [5] to renew the account. Follow the same steps (above) you completed for the initial account creation.

Listing Non-UCSF Collaborators in iRIS

iRIS has generated some confusion about how investigators are to handle non-UCSF collaborators who fit the definition of Key Study Personnel (KSP) [9]. In particular, there is confusion over which collaborators need to obtain iRIS accounts, and how and when to list collaborators on the application.

First, you should distinguish between collaborators who will need access to iRIS and those who do not.

Non-UCSF collaborators who **do not** need iRIS access

These collaborators do not need affiliate access. They also will **not** be listed as KSP in section 3.0 of the application. Describe their involvement in the study as explained below.

Non-UCSF collaborators who need iRIS access

These collaborators typically need iRIS access in order to make changes to the study or download study documents. You need to request iRIS affiliate access for these collaborators. After access is granted, list these individuals as KSP in section 3.0 and possible 4.0 of the IRB application. Describe their involvement in the study as explained below.

For ALL collaborators, specify that you are collaborating with another site and explain the role of that site:

Sites section

Specify that you are collaborating with one or more of the outside site options.

Outside Site Information sub-form

Complete this form for each site with which you are collaborating.

*If you are asking UCSF to serve as the IRB of record for a non-affiliated site [10], also attach a letter from the site deferring to the UCSF IRB **and** the collaborators' human subjects training certificates.*

Procedures section

Elaborate further on what the outside site(s) is doing and its role in the study in this section or elsewhere in the application.

For more information on collaborating with other sites, review the Working With Other Institutions [11] page.

Departmental Access to iRIS

The IRB may grant special departmental access to department MSOs, department Research Finance Administrators or other individuals who justify needing this type of access. After this access is granted, you will have read-only access to all studies that are being done in your department(s).

To request access to departmental information within iRIS:

1. Complete the Departmental Access Request Form ^[12] and
2. Email the completed form to CHR.SystemProject@ucsf.edu ^[13].
